

Please replace the Abstract with the following paragraph

The invention provides a pharmaceutical composition which comprises a pharmaceutical carrier and at least one compound selected from the group consisting of ~~eobaltacene-oetgomet~~cobaltocene-octamethyl, stigmastan-3,5-diene, galoxolide, benzyl salicylate, eucalyptol, and α -pinene. Also provided is a method of preparing a composition having antimicrobial activity comprising extracting a plant material in an organic solvent, contacting the extracted material to a chromatographic column, and eluting from the chromatographic column with a mobile polar phase to obtain a composition. The plant material is from *Mammea Americana*, *Marchantaceae polymorpha*, or *Callistemon citrinus*. Also provided is a method of inhibiting the growth of a mycobacterium, comprising administering a composition comprising a carrier and at least one compound selected from among ~~eobaltacene-oetgomet~~cobaltocene-octamethyl, stigmastan, 3,5-diene, friedelin, galoxolide, benzyl salicylate, eucalyptol, and α -pinene.
